Art Unit: 3681

REASONS FOR ALLOWANCE

the amendment filed on May 25, 2005 has been entered. The specification and claim 35 have been amended.

The replacement drawing sheets containing Figures 3, 4, 8 and 13 filed on May 25, 2005 are acceptable.

Claims 1-44 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the prior art of record shows or suggests a power transmission device comprising a rotary input member, a rotary output, a torque transmission mechanism including a friction clutch operably disposed between the input member and the output member, a clutch actuator including a rotary operator and a thrust mechanism, and an electrohydraulic control system including a fluid pump, an electric motor, a control valve, and a control unit arranged together in the manner specified in claim 1, and particularly wherein the rotary operator has first and second components defining an actuation chamber and a return chamber therebetween, the first component being fixed for rotation with one of the input and output members and the second component adapted to rotate relative to the first component.

Nor does the prior art of record show or suggest a power transfer device comprising a first shaft, a second shaft, a torque transmission mechanism including a friction clutch operably disposed between the first and second shafts, a clutch actuator

including a fluid pump, a rotary operator and a thrust mechanism, and a control system including a motor, a control valve, and a control unit arranged together in the manner specified in claim 21, and particularly wherein the rotary operator has first and second components defining an actuation chamber and a return chamber therebetween, the first component being fixed for rotation with one of the first and second shafts and the second component adapted to rotate relative to the first component.

Page 3

Nor does the prior art of record show or suggest a torque transmission mechanism comprising a input member, an output member, a clutch pack operably disposed between the input and output members, an apply plate, a clutch actuator including a fluid pump, a rotary operator and a thrust mechanism, and a control system including a control valve arranged together in the manner specified in claim 34, and particularly wherein the rotary operator has first and second components defining an actuation chamber and a return chamber therebetween, the first component being fixed for rotation with one of the input and output members and the second component adapted to rotate relative to the first component.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard M. Lorence whose telephone number is (571) 272-7094. The examiner can normally be reached on Mondays through Fridays from 9:00AM to 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles A. Marmor can be reached on (571) 272-7095. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
